

## STEP 1

Place chemical resistant glove onto hand to avoid contact with strong acid from reagent.

Reagents contain toxic & caustic chemicals. Keep away from eyes, skin & food!

**IF ANY IS SPILLED ON SKIN OR CLOTHING WASH IMMEDIATELY WITH LOTS OF WATER!**

## STEP 2

Use a key or other hard device (making sure it's clean from any drugs). Scrape a small amount of your pill into gloved hand.

Approximately a quarter to a half of a match head in size is enough for two tests.

## STEP 3

Place 1/2 the powder from scraping into reagent bottle carefully by scooping open bottle into gloved hand.

## STEP 4

Screw lid back on reagent bottle tightly. Lightly tap bottle so powder contacts reagent and look for colour change.

## STEP 5

Repeat steps 3 & 4 with Mecke. When finished please dispose of glove & wash hands. The test kit bottles can be taken home, washed out and re-used.

If you aren't able to return home with the used bottles please dispose of in the garbage.

MANDELIN	MECKE	SUSPECTED DRUG	NOTES
 Reacts Quickly	 Reacts Quickly	<b>MDMA / MDEA / MDA (Also known as MDxx)</b>	>10sec to react with Mandelin indicates very low potency
 Reacts Quickly	<i>No Reaction</i>	<b>Amphetamine or Methamphetamine</b>	
 Reacts Quickly	 Slowly Changes Colour	<b>Methylone (bk-MDMA)</b>	
 Reacts Quickly	<i>No Reaction</i> (may smoke)	<b>Mephedrone (4-MMC)</b>	
 No reaction with 1yr old kit! USE NEW KIT!	<i>No Reaction</i> (Pale light yellow after 5min with very new kit)	<b>Ketamine</b>	Sometimes PMA shows no reaction to Mecke & could be mistaken for Ketamine!
 Immediately Reacts	 Immediately Reacts	<b>LSD</b>	Best results seen testing LSD liquid (drops). If testing a pill use a large scraping. Won't test LSD tabs (blotters).
 Reacts quickly	 Reacts quickly	<b>2C-B</b>	
<i>No Reaction</i> (May react brown with brand new Kit)	 Immediately reacts	<b>2C-I</b>	
 Fairly Quick Reaction	 Fairly Quick Reaction	<b>2C-T-7</b>	2C-T-7 - dangerous if consumed with MDxx or a number of other drugs
 Slow to Green	 Immediately Reacts	<b>DXM</b>	DXM - dangerous if consumed with MDxx or a number of other drugs
 Fairly Quick Reaction	 Fairly Quick Reaction	<b>Heroin</b>	Must use another reagent such as Marquis to tell apart from PMA or PMMA!
 Fairly Quick Reaction	 Sometimes no reaction	<b>PMA or PMMA</b>	PMA or PMMA - high risk of death if consumed
<i>No Reaction</i>	<i>No Reaction</i>	<b>Piperazines (such as BZP / TFMPP / mCPP)</b>	Piperazines - high risk of bad side effects if consumed and some risk of death
 No Reaction	<i>No Reaction</i>	<b>Strychnine</b>	Very toxic poison - high risk of death if consumed

**These kits & chart were made in the interests of harm reduction & saving lives.**

(Version: 18-Dec-2019)

REAGENTS SHOULD ONLY BE USED TO HELP GIVE AN INDICATION OF DANGEROUS SUBSTANCES. WE ACCEPT NO LIABILITY FOR MISUSE OR INACCURACY.

**EVEN USING THIS CHART SOME REACTIONS MAY LOOK THE SAME FOR SOME DIFFERENT MIXTURES OF DRUGS AND OR IMPURITIES!**

Example: MDxx + PMA or PMMA – may appear same reaction as containing only MDxx. Larger risk of death than consuming only PMA or PMMA!

Example: MDxx + Piperazines – will appear same reaction as containing only MDxx. High risk of bad side effects if consumed and some risk of death.

**TIPS TO AVOID DEATH FROM SEROTONIN SYNDROME:** In some rare cases, lab tested pills have been shown to contain PMMA & MDMA (on ecstasysaydata.org). This test kit will likely show this reaction the same as just MDxx. This combination is even more risky for serotonin syndrome (and death) than PMA or PMMA alone! Look for signs of fever (shivering, the user often thinks they are cold but their body temperature is very high or forehead is hot to touch). In this event, remove excess clothing, cool the body (especially the head) with wet cloths & seek emergency medical treatment! Forensic reports indicate PMA & PMMA deaths have often occurred from overheating due to serotonin syndrome.

To watch videos of many different, lab verified drug samples reacting to the different reagents please check out: **Acinad Romanoff** channel on YouTube.

Please check pillreports.net and ecstasysaydata.org to see if there are any reports on your pill.
